APPLICATION GUIDE

- **New walls:**
After curing (30-40 days) apply one brush coat of Isolante a solvente P.P. or Fissativo Acrilico (diluted 1:4 with water). Wait at least 12 hours then apply two coats of Idea.
- **Walls to repaint**
 - **Unpainted degraded walls:** thoroughly brush with a wire brush. Clean with water or low pressure washer; when the surface is dry, apply one brush coat of Isolante a Solvente P.P. or Fissativo Acrilico (diluted 1:4 with water). After 18 hours apply two coats of Idea.
 - **Walls with old paint and loose plasters:** remove all flaky areas and brush with a wire brush. Clean with water or low pressure washer and let dry. Restore the removed areas with hydraulic mortar or ready-mixed concrete. Let the substrate cure for at least 10 days. Apply one brush coat of Fissativo Acrilico (diluted 1:5 with water), only over the restored areas or over the whole surface if it needs consolidating. Wait at least 12 hours and apply two coats of Idea.
 - **Walls with old paint in good conditions:** clean with water or low pressure washer and when the substrate is dry, apply two coats of Idea.
In case the surface needs consolidating, apply one brush coat of Fissativo Acrilico (diluted 1:6 with water).
